**Reviewer-1**

1. Include more details on the scalability of the system for larger or multiple monument sites.
2. Explore alternative biometric methods, such as facial recognition, for improved user convenience.
3. Provide a detailed security analysis to ensure the protection of personal data in the system.
4. Discuss how the system can handle peak tourist seasons or high traffic volumes.
5. Include potential integration with other tourist services, like transportation or guided tours.
6. Clarify the app's user interface design and how it accommodates different user demographics.

**Reviewer-2**

Thank you for your submission. Your manuscript presents an engaging and well-defined subject, and it leaves a generally positive impression. However, several critical areas must be addressed before the paper can be considered for publication:

1. Clarify Novelty and Performance Advantage: The manuscript should explicitly articulate the novelty of the proposed approach, along with a detailed explanation of how it delivers a measurable performance advantage. Supporting evidence and comprehensive analysis should be provided to substantiate these claims.
2. Highlight Main Contributions in the Introduction: The introduction should clearly define the principal contributions of the work. This will allow readers to immediately grasp the research's significance and the specific advancements it offers.
3. Include a Section on Societal Impact: A dedicated section discussing the broader societal implications and practical relevance of the study is recommended. This will underscore the real-world value and applicability of the research findings.
4. Suggest Future Research Directions: The manuscript should include a discussion of future research avenues based on the current findings. Outlining potential extensions and open challenges will highlight the ongoing relevance and potential of the work.
5. Incorporate Recent References: The reference list should be updated to include pertinent studies from 2023 and 2024. This will ensure the paper aligns with the latest developments in the field.
6. Expand the Literature Review: The literature review section should be expanded to integrate recent research contributions from 2023 and 2024. This will strengthen the contextual foundation and enhance the scholarly depth of the manuscript

With Best Regards
